SPS Increment 3 Capabilities

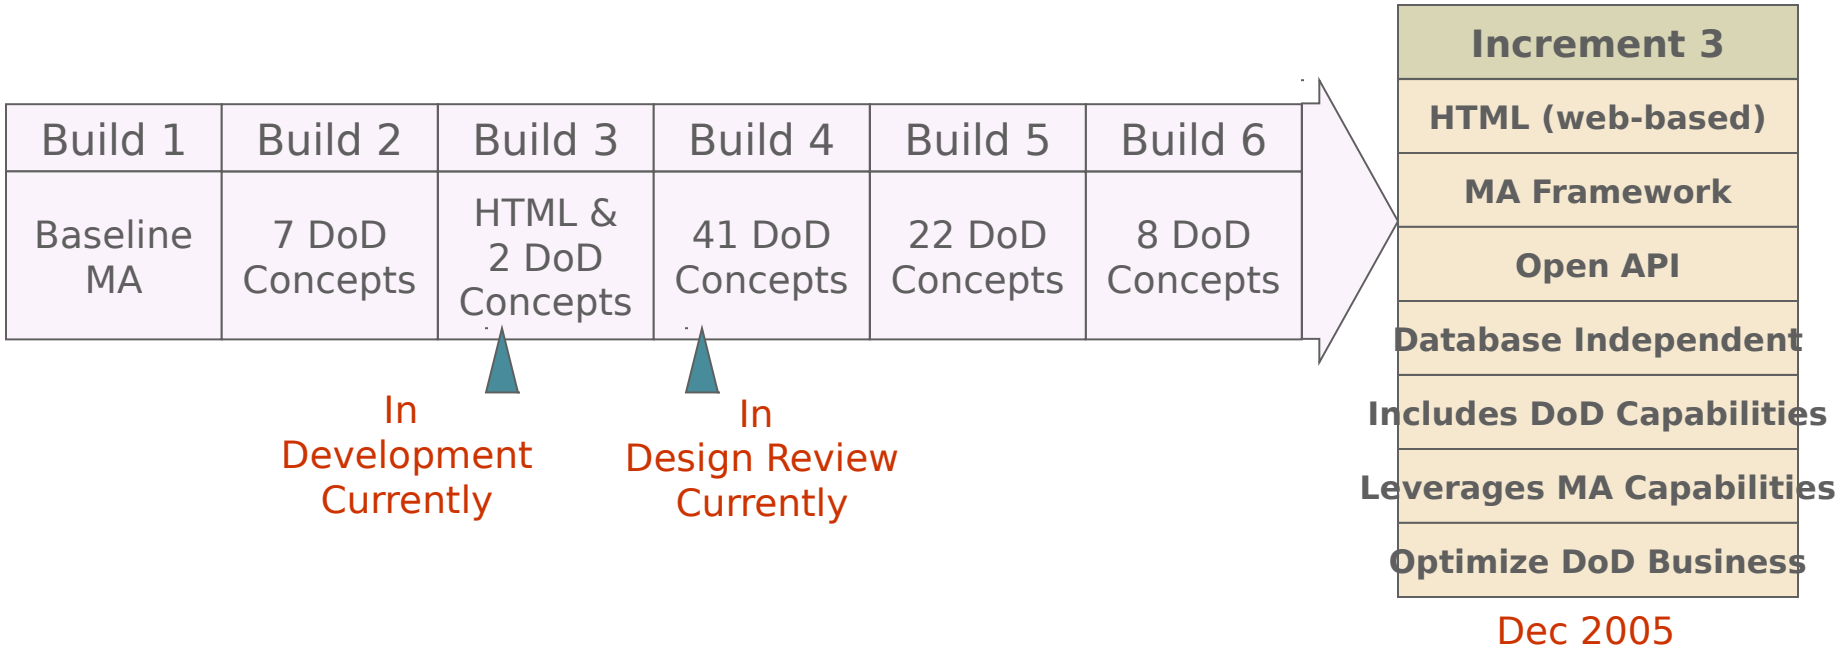
March 2004

American Management Systems, Inc. 2003

SPS Increment 3 Today

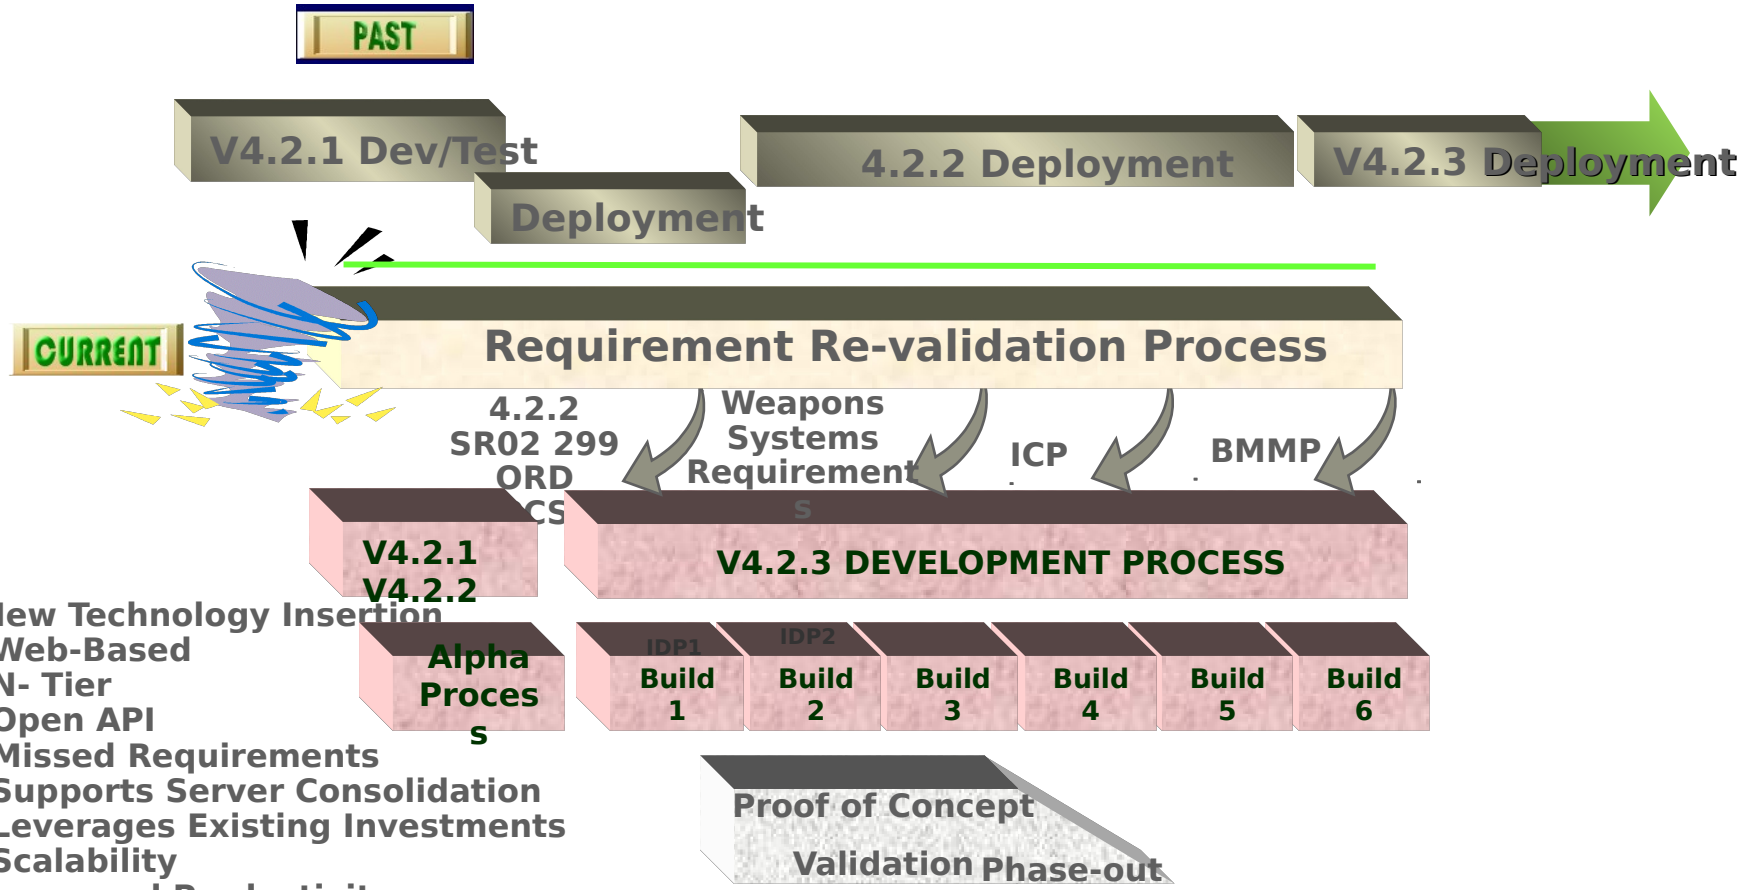
- USD (AT&L) Mr. Wynne memo of Nov 26, 2003
  - SPS is the cornerstone of Acquisition Domain
  - Supports v4.2 including Increment 3 through at least 2010
- SPS Increment 3 (v4.2.3)
  - Next Generation of SPS
  - 6 Builds completing in 12/05
  - Inherits security and other benefits from Momentum architecture
  - HTML Web Based
  - Contract signed on Oct 17, 2003
  - Meets all original SPS requirements

SPS Increment 3 - Designed and Built in Six Stages



Starting with Momentum Acquisitions, six software builds will result in a single, total-package fielding in FY06

SPS Increment 3 Strategy



- New Technology Insertion
- Web-Based
- N- Tier
- Open API
- Missed Requirements
- Supports Server Consolidation
- Leverages Existing Investments
- Scalability
- Improved Productivity

V4.2.3 Functional Improvements

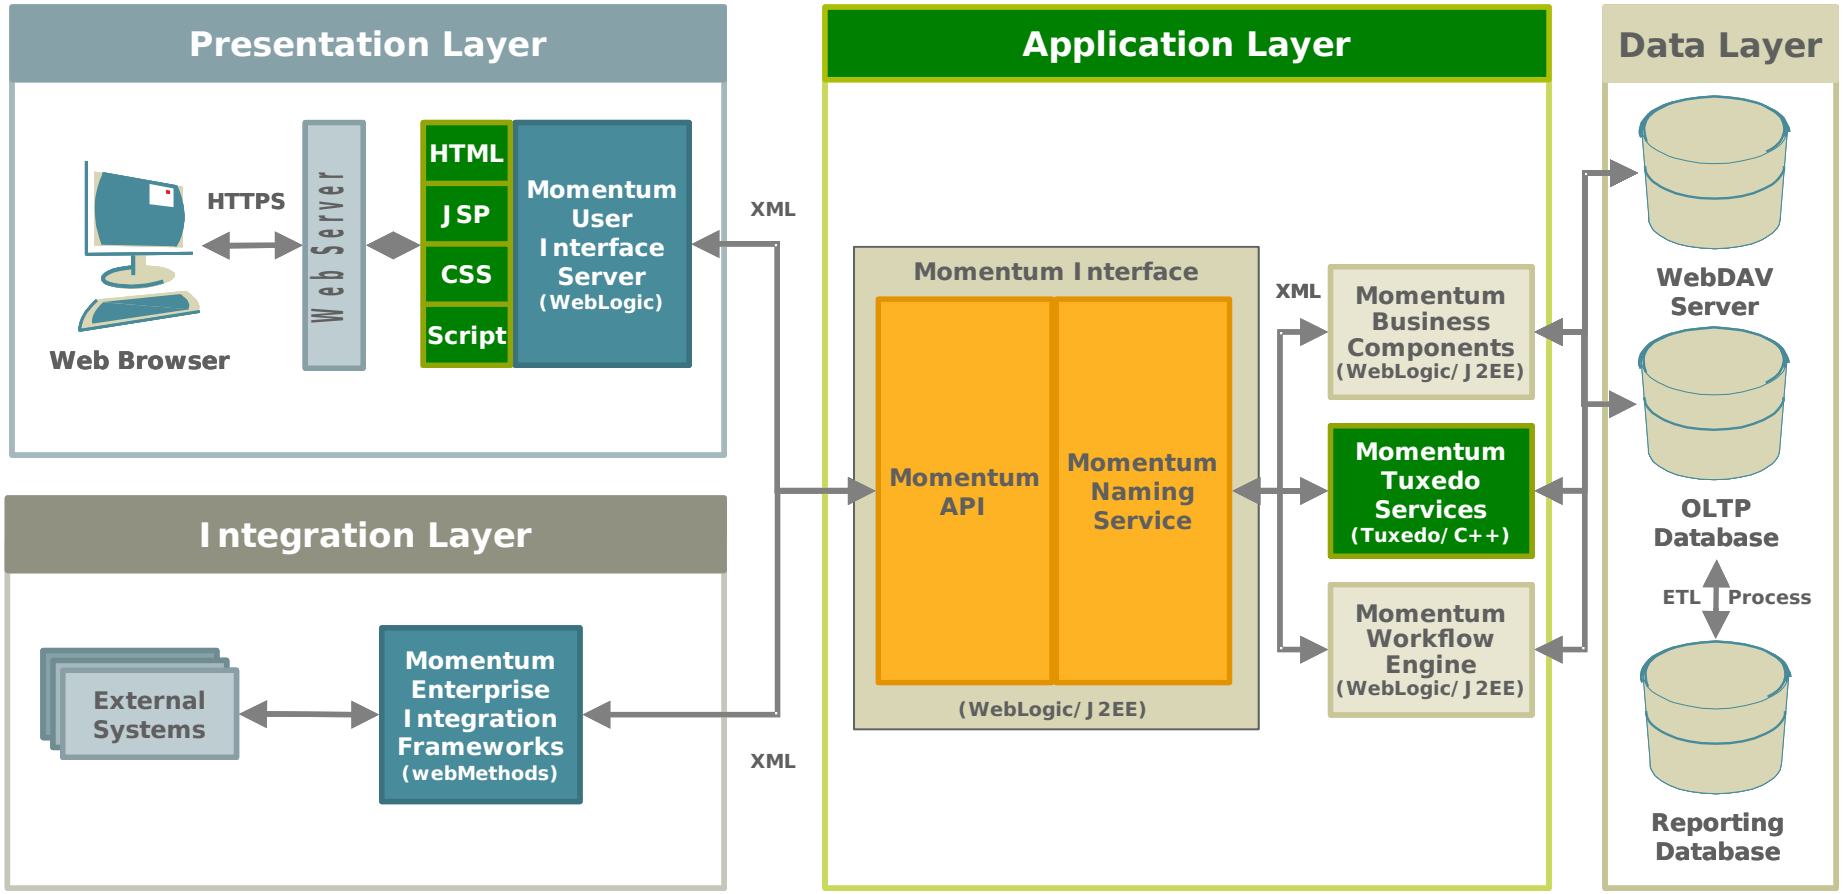
- Improved Contract Modification Process
  - Moves to a delta centric model with stand-alone mods
  - Allows workflow for post-award activities
- Greater Workload Visibility
  - Document Routing/Workload based on organizational structure
  - Document linking creates virtual contract file
- Extensive Document Configurability
  - Formless entry of Structured Data
  - Document copying capabilities
  - Document Output uses PDF format instead of MS Word

V4.2.3 Functional Improvements

- Provides Full Offer-Evaluation Capabilities
- Enables Archiving
- Meets BMMP Requirements
- System Administration Improvements
  - Reference data maintenance capabilities
  - Configurable password standards
  - System security model can align with organizational hierarchy

American Management Systems, Inc. 2003

v4.2.3 Technical Architecture



Technical Improvements

- **Open Architecture**
  - Based on XML (adapter) technology
  - Enables standard integration with ERP and legacy systems
  - Fewer point-to-point interfaces
- **Web-Based**
  - No footprint on user's machine
  - Enables true remote access
- **Flexible**
  - Adapts to agency functional models
  - Easily adapts to new legislation and business processes
- **Scalable**
  - Support high volume transactions
  - Enables automation
- **Supports a Variety of Database Platforms**
- **Operates with an Integrated Document Management System**
  - No blobs stored in operational database
  - Database growth rate significantly reduced
- **Advanced reporting using Business Objects**
  - Portal integration provides consistent look, feel and navigation
  - Security integration for the security model
